

Republika e Kosovës-
Republika Kosova - Republic of Kosovo
Qeveria –Vlada – Government

Number: 36/12
Date: 05.07.2012

The Steering Council of the National Qualification Authority, based on Article 4, paragraphs 1, 3, 6, 9 and Article 5 paragraphs 1, 2, 3 of the work Regulation of the Steering Council of NQA, as well as, in support of Articles 14, 15, 16, 17 of this Regulation, and based on the Law for national Qualifications (no. 03- L 0600), Article 10, Article 21.3, Article 22, and in support of the Administrative Instruction no. 0112011, approved by MEST on the Criteria and procedures for validation and approval of national qualifications and accreditation of institutions providing qualifications in Kosovo, the Steering Council of the National Qualification Authority issues this:

DECISION

On separating qualifications from the sector of machinery

- I. Approves the separation of qualifications from water installation and central heating installation technician to:
 1. Water and sewage installation technician;
 2. Central heating installation technician.

- II. Decision enters into force on the date of its signing.

- III. Decision is sent to all stakeholders

Rationale

Professional standards have been separated for each qualification: water and sewage technician qualification and central heating installation technician. As a result of consultations with experts of machinery field, it was evaluated that the qualification water and central heating installation technician should be separated and function as separate qualifications, as water and sewage installation technician and as central heating installation technician.

It has to be taken into consideration that the Administrative Instruction 01/2011 approved in February 2011 by MEST on the Criteria and procedures for the validation of approval of national qualifications and accreditation of institutions which provide qualifications in Kosovo does not define this separation of qualifications according to criteria.

The Head of the SC of NQA
Ragip Gjoshi
